

Add or remove titles

Activate the menu item "Removing / adding titles" in the options menu.

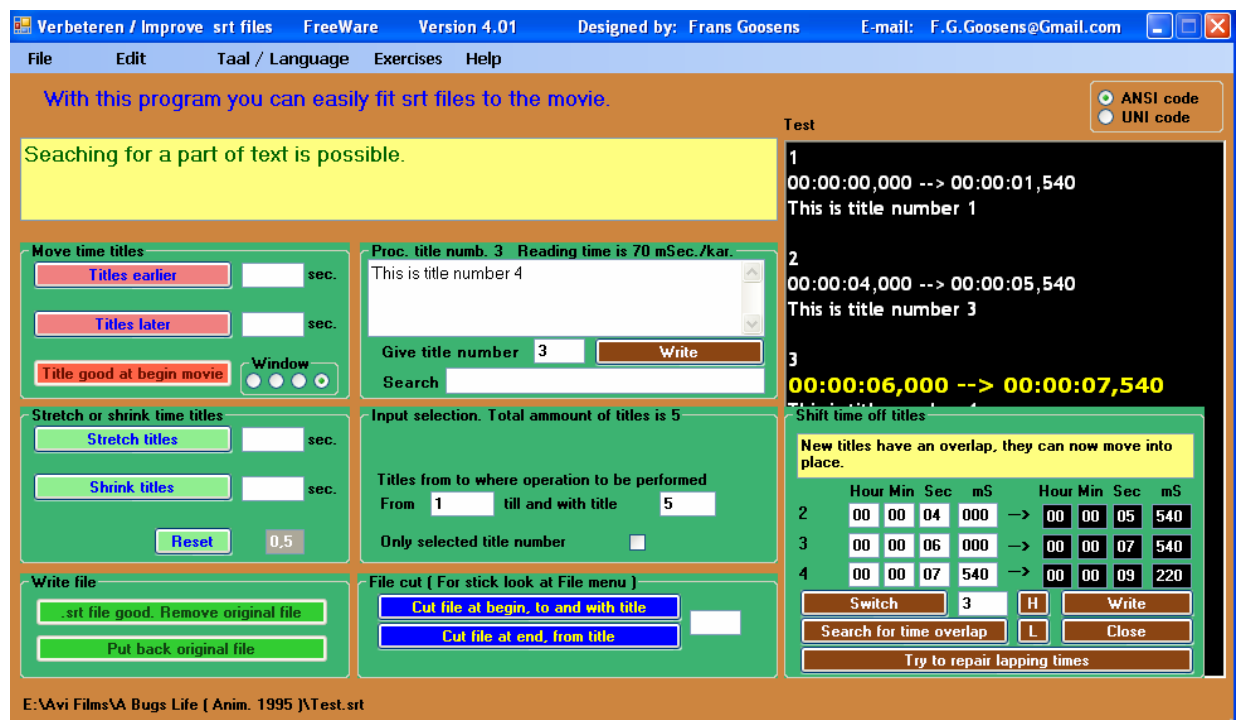

If you press this menu item, you see picture below.

Here we delete title 2 and add a new title.
See example below.

When you remove the text off title 2, don't remove title number.
 This is because scrolling is between title numbers.
 Between 4 and 5 is inserted a new title. Do this without a title number.
 Make a srt file by clicking on corresponding button.
 See example below.

The current titles now have the original times.
 The new title get the new time witch is calculated based on the "Adjust reading time" menu. The new titles are just lapping so they are easily detected.
 This new title you must only put in place by shifting the begin time.

If there is not enough time between the titles, you have to change the times off the other titles a little bit.

Don't forget to write before you change title number
